Contents

Preface ix

SECTION I: BULK GROWTH, DOPING AND RELATED CHARACTERISATION

Mechanism of vapour growth and defect formation in large mercuric iodide crystals *
M. Piechotka 1
α-Mercuric iodide crystal growth by physical vapour transport *
R. Cadoret 9
Bulk and surface stoichiometry of vapor grown mercuric iodide crystals *
M. Schieber, M. Roth, H. Yao, M. DeVries, R.B. James and M. Goorsky 15
Optical methods for measuring iodine vapor during mercuric iodide crystal growth by physical vapor transport
D. Nason, Y. Biao and A. Burger 23
Crystal growth and characterisation of urea by physical vapour transport in semi-open cells *
M. Zha, P. Franzosi, L. Zanotti, G. Zuccalli, C. Paorici, R. Capelletti and C. Razzetti 29
First results on silicon carbide vapour phase epitaxy growth in a new type of vertical low pressure chemical vapour deposition reactor
R. Rupp, P. Lanig, J. Völkl and D. Stephani 37
Mass flux of ZnSe by physical vapor transport
Y.-G. Sha, C.-H. Su, W. Palosz, M.P. Volz, D.C. Gillies, F.R. Szofran, S.L. Lehoczky, H.-C. Liu and R.F. Brebick 42
Gas effect on transport rates of ZnSe in closed ampoules
T. Muranoi, T. Shiohara, A. Sotokawa, H. Yoshida, S. Isobe and N. Kanbe 49
Zinc selenide single crystal growth by chemical transport reactions
K. Böttcher and H. Hartmann 53
Stoichiometry of CdS crystals and their optical and lasing properties
A. Kazlauskas, V. Gavryushin, G. Račuikaitis and O. Makienko 59
Bulk vapour growth of CdTe *
K. Grasza 65
Effect of temperature field on growth stability
K. Grasza 69
The optimal temperature profile in crystal growth from the vapour
K. Grasza, E. Janik, A. Mycielski and J. Bąk-Misiuk 75
Doping of wide gap II–VI compounds *
W. Faschinger 80
Doping of GaSb single crystals with various elements
V. Šestáková and B. Štěpánek 87
Closed tube vapour growth of CdTe:V and CdTe:Ti and its characterization
R. Schwarz, W. Joerger, C. Eiche, M. Fiederle and K.W. Benz 92
Investigation of CdTe:Cl grown from the vapour phase under microgravity conditions with time dependent charge measurements and photoinduced current transient spectroscopy
C. Eiche, W. Joerger, M. Fiederle, D. Ebling, R. Schwarz and K.W. Benz 98

SECTION II: GENERAL CHARACTERISATION

Characterization of vapor phase growth using X-ray techniques *
D.W. Kisker, G.B. Stephenson, P.H. Fuoss and S. Brennan 104

* Invited paper.

A study of structural defects in vapour grown α-HgI_2 single crystals by γ-ray diffraction
A. Rossberg, M. Piechotka, A. Magerl, E. Steichele, G. Wetzel and E. Kaldis 112
In-situ observation of chemical vapour deposition growth of epitaxial SiGe thin films by reflection supported pyrometric interferometry
G. Ritter, B. Tillack, M. Weidner, P. Zaumseil, F.G. Böbel, B. Hertel and H. Möller 119
Characterization of cadmium telluride crystals grown by different techniques from the vapour phase
M. Laasch, R. Schwarz, W. Joerger, C. Eiche, M. Fiederle, K.W. Benz and K. Grasza 125
Stress birefringence and microinclusions in sublimation-grown bulk CdTe
G. Kloess, M. Laasch, R. Schwarz and K.W. Benz 130
Measurement of etch pit densities in diffused samples of CdTe
M.U. Ahmed, E.D. Jones, J.B. Mullin and N.M. Stewart 136
Studies of the compensation mechanism in CdTe grown from the vapour phase
M. Fiederle, D. Ebling, C. Eiche, P. Hug, W. Joerger, M. Laasch, R. Schwarz, M. Saik and K.W. Benz 142
Atomic level interface structure of InP/InPAs/InP measured by X-ray crystal truncation rod scattering
M. Tabuchi, Y. Takeda, Y. Sakuraba, T. Kumamoto, K. Fujibayashi, I. Takahashi, J. Harada and H. Kamei 148
Quantum transport effects in a two-dimensional electron gas as a tool for the investigation of heterointerfaces
A.M. Kreshchuk, S.V. Novikov, T.A. Polyanskaya, I.G. Savel'ev and A.Ya. Shik 153
Characterization of high-quality molecular beam epitaxial grown $In_xAl_zGa_{1-x-z}As/In_yAl_uGa_{1-u-y}As/InP$ heterostructures
H. Hillmer, R. Lösch, W. Schlapp and A. Pöcker 159

SECTION III: FUNDAMENTAL STUDIES

Fluctuations and instabilities of steps in the growth and sublimation of crystals *
M. Uwaha, Y. Saito and M. Sato 164
Theoretical study of macrostep stability under temperature gradient
A.N. Danilewsky, Y. Okamoto, T. Nishinaga and K.W. Benz 171
Theoretical studies of step edge supersaturation and its As/Ga flux dependence in molecular beam epitaxy of GaAs on vicinal surfaces
K. Miwa and T. Nishinaga 177
Multiatomic step formation mechanism of metalorganic vapor phase epitaxial grown GaAs vicinal surfaces and its application to quantum well wires
T. Fukui, J. Ishizaki, S. Hara, J. Motohisa and H. Hasegawa 183
Effects of adsorbates on step coverage in TiN chemical vapor deposition
Y. Ohshita, W. Fukagawa and A. Kobayashi 188
Three-dimensional towards two-dimensional coherent epitaxy initiated by surfactants
R. Kern and P. Müller 193
Growth mechanism of a Ag crystal particle containing a twin plane grown on a Mo(110) surface
Y. Gotoh, A. Horii, H. Kawanowa, M. Kamei, H. Yumoto and T. Gonda 198

SECTION IV: MODELLING

A multigrid solver for fluid flow and mass transfer coupled with grey-body surface radiation for the numerical simulation of chemical vapor deposition processes
F. Durst, L. Kadinski and M. Schäfer 202
Development of advanced mathematical models for numerical calculations of radiative heat transfer in metalorganic chemical vapour deposition reactors
L. Kadinski, Yu.N. Makarov, M. Schäfer, M.G. Vasil'ev and V.S. Yuferev 209
On the sublimation growth of SiC bulk crystals: development of a numerical process model
D. Hofmann, M. Heinze, A. Winnacker, F. Durst. L. Kadinski, P. Kaufmann, Yu. Makarov and M. Schäfer 214
Three-dimensional model calculations of epitaxial growth by Monte Carlo simulation
M. Tagwerker, W.M. Plotz and H. Sitter 220

SECTION V: GROWTH STUDIES AND MECHANISMS

Growth of C_{60} crystals from the vapor phase *
E. Schönherr, K. Matsumoto and M. Wojnowski 227
Studies of the growth mechanism of polycrystalline $CuInSe_2$ thin films prepared by a sequential process
S. Zweigart, D. Schmid, J. Kessler, H. Dittrich and H.W. Schock 233
In situ gravimetric monitoring of arsenic desorption in GaAs atomic layer epitaxy
A. Koukitu, N. Takahashi, Y. Miura and H. Seki 239
Vapour phase epitaxial grown GaAs films with a very low deep level concentration
V.V. Chaldyshev, E.V. Astrova, A.A. Lebedev, I.A. Bobrovnikova, N.A. Chernov, O.M. Ivleva, L.G. Lavrentieva, I.V. Teterkina and M.D. Vilisova 246
Growth of $CuInTe_2$ polycrystalline thin films
V. Nadeneau, T. Walter and H.W. Schock 251
Characterization of ⟨111⟩ cadmium telluride electrodeposited on cadmium sulphide
A. Kampmann, P. Cowache, B. Mokili, D. Lincot and J. Vedel 256
Influence of growth rates on properties of InN thin films
Y. Sato and S. Sato 262
Surface topography of epitaxial Au(111) films deposited on MoS_2
S. Nagashima and I. Otsuka 266
Growth mechanism and electronic properties of doped pyrite (FeS_2) crystals
Y. Tomm, R. Schieck, K. Ellmer and S. Fiechter 271

SECTION VI: LPE

Liquid phase electroepitaxy of III–V semiconductors *
L.V. Golubev, A.V. Egorov, S.V. Novikov and Yu.V. Shmartsev 277
Liquid phase electroepitaxial growth of thick and compositionally uniform AlGaAs layers on GaAs substrates
Z.R. Zytkiewicz 283
Preparation of periodic structures by meander type liquid phase epitaxy
D. Nohavica and J. Oswald 287
Silicon layers on polycrystalline silicon substrates – influence of growth parameters during liquid phase epitaxy
B. Steiner and G. Wagner 293
Etchback-regrowth process for AlGaAs/GaAs solar cell structures
A. Baldus, A. Bett, U. Blieske, O.V. Sulima and W. Wettling 299
Investigation of GaAs growth from Bi-based melts for solar cells
A. Baldus, A. Bett, O.V. Sulima and W. Wettling 305
Liquid phase epitaxial growth of elastically strained InGaAsP layers for spin-polarized electron sources
Yu.B. Bolkhovityanov, V.L. Alperovich, A.S. Jaroshevich, N.V. Nomerotsky, A.G. Paulish, A.S. Terekhov and E.M. Trukhanov 310
Epitaxial lateral overgrowth of InP by liquid phase epitaxy
S. Naritsuka and T. Nishinaga 314
Liquid phase epitaxy and photoluminescence characterization of p-type GaSb layers grown from Bi based melts
P. Gladkov, E. Monova and J. Weber 319

SECTION VII: MBE AND CBE, BASIC STUDIES AND III–Vs

Elementary growth process of molecular beam epitaxy *
T. Nishinaga 326
Elementary processes in molecular beam epitaxy studied by in-situ scanning electron microscopy *
N. Inoue 334
Auger investigation of group III nitride films grown by molecular beam epitaxy
S.V. Novikov, C.T. Foxon, T.S. Cheng, T.L. Tansley, J.W. Orton, D.E. Lacklison, D. Johnston, N. Baba-Ali, S.E. Hooper, L.C. Jenkins and L. Eaves 340
Time-resolved reflection high energy electron diffraction study of dynamical surface processes during molecular beam epitaxy of GaAs and AlAs
S.Yu. Karpov, V.E. Myachin and Yu.V. Pogorelsky 344

Time-resolved reflection high energy electron diffraction analysis for atomic layer depositions of GaSb by molecular beam epitaxy
M. Yano, K. Yamamoto, T. Utatsu and M. Inoue 349
In-situ observation of GaAs selective epitaxy on GaAs (111)B substrates
F. Allegretti, M. Inoue and T. Nishinaga 354
A study on in-situ maskless selective epitaxy of GaAs by a low-energy Ga focused ion beam with an As_4 molecular beam
I. Saitoh, K. Pak, Y. Inoue, N. Ohshima and H. Yonezu 359
Island formation of InAs grown on GaAs
Y. Nabetani, N. Yamamoto, T. Tokuda and A. Sasaki 363
Defect control during growth of highly mismatched (100) InAs/GaAs-heterostructures
A. Trampert, E. Tournié and K.H. Ploog 368
Inter-surface diffusion of In on (111)A-(001) InAs nonplanar substrates in molecular beam epitaxy
X.Q. Shen and T. Nishinaga 374
Interface structures in GaAs/Al(Ga)As quantum wells controlled by metalorganic vapor phase epitaxy and molecular beam epitaxy
N. Inoue, K. Ikuta, M. Shinohara and J. Osaka 379
Molecular beam epitaxial growth of AlGaAs p–n junctions on GaAs(111)A substrates using only silicon dopant
K. Fujita, K. Nitatori, M. Hosoda, T. Egawa, Y. Niwano, T. Jimbo, M. Umeno and T. Watanabe 384
High-quality Si-doped GaAs/$In_{0.1}Al_{0.9}As$ alternating $\lambda/4$ layers grown on a slightly misorientated GaAs(111)A substrate by molecular beam epitaxy
K. Nitatori, K. Fujita and T. Watanabe 389
In-situ monitoring of carbon doped GaAs and of periodic carbon doped GaAs/AlAs structures grown by chemical beam epitaxy
T.B. Joyce, T.J. Bullough and S. Westwater 394
The use of diethylsulphide for the doping of $Al_xGa_{1-x}As$ grown by chemical beam epitaxy
T.L. Pfeffer, T.J. Bullough, T.B. Joyce and A.C. Jones 399

SECTION VIII: MBE, II–VIs, CHALCOPYRITES AND SILICIDES

Monocrystalline (100)-oriented ZnS layers grown on Si by molecular beam epitaxy
E. Wirthl, H. Sitter and P. Bauer 404
Epitaxial films of the 3D semiconductor CdS on the 2D layered substrate MX_2 prepared by Van der Waals epitaxy
T. Löher, Y. Tomm, C. Pettenkofer, M. Giersig and W. Jaegermann 408
Epitaxial growth and photoluminescence of hexagonal $CdS_{1-x}Se_x$ alloy
M. Grün, H. Gerlach, Th. Breitkopf, M. Hetterich, A. Reznitsky, H. Kalt and C. Klingshirn 414
Type I–type II band offset transition of the ZnMgSe–ZnTe system
S.O. Ferreira, H. Sitter, W. Faschinger, R. Krump and G. Brunthaler 418
Reflection high-energy electron diffraction controlled growth of ZnSe/(Zn, Mn)Se quantum well structures
N. Hoffmann, J. Griesche, W. Heimbrodt, V. Weinhold and K. Jacobs 422
Molecular beam epitaxial growth and segregation of $Hg_{1-x}Zn_xSe$ alloys
S. Einfeldt, U. Lunz, H. Heinke, C.R. Becker and G. Landwehr 427
Interdiffusion of In, Te at the interface of molecular beam epitaxial grown CdTe/InSb heterostructures
M. Kimata, T. Suzuki, K. Shimomura and M. Yano 433
InSe/GaSe heterointerfaces prepared by Van der Waals epitaxy
O. Lang, A. Klein, R. Schlaf, T. Löher, C. Pettenkofer, W. Jaegermann and A. Chevy 439
Chemical beam epitaxy of iron disilicide on silicon
J.Y. Natoli, I. Berbezier, A. Ronda and J. Derrien 444
Hard heteroepitaxy of molecular beam epitaxial grown PbTe on off oriented GaAs(100) substrates
J. Sadowski and M.A. Herman 449

SECTION IX: MOCVD AND MOVPE, BASIC STUDIES, PRECURSORS AND III–Vs

Crystal growth of column III nitrides and their applications to short wavelength light emitters *
I. Akasaki and H. Amano 455
Growth of $Al_xIn_{1-x}N$ single crystal films by microwave-excited metalorganic vapor phase epitaxy
Q. Guo, H. Ogawa and A. Yoshida 462

In situ monitoring of the growth process in GaAs atomic layer epitaxy by gravimetric and optical methods *
A. Koukitu, N. Takahashi and H. Seki 467
A theory for metalorganic vapor phase epitaxial selective growth on planar patterned substrates
T. Fujii, M. Ekawa and S. Yamazaki 475
Growth behavior on V-grooved high Miller index GaAs substrates by metalorganic chemical vapor deposition
M.-S. Kim, Y. Kim, M.-S. Lee, Y.J. Park, S.-I. Kim and S.-K. Min 482
A new lattice relaxation mode in InGaAs on GaAs
T. Fujii and S. Yamazaki 489
Growth of InAs/GaSb strained layer superlattices.II
G.R. Booker, P.C. Klipstein, M. Lakrimi, S. Lyapin, N.J. Mason, I.J. Murgatroyd, R.J. Nicholas, T.-Y. Seong, D.M. Symons and P.J. Walker 495
Recent developments in metalorganic precursors for metalorganic chemical vapour deposition *
A.C. Jones, S.A. Rushworth and J. Auld 503
A new precursor for epitaxial growth of indium based semiconductors
G. Rossetto, R. Franzheld, A. Camporese, M.L. Favaro, G. Torzo, D. Ajà and P. Zanella 511
The n-type doping of GaAs/$Al_xGa_{1-x}As$ and growth of two-dimensional electron gas structures with DEAlH–NMe_3 as Al source
R. Hövel, E. Steimetz, St. Mannheim, V. Sommer, J. Woitok, J. Finders and K. Heime 515
Investigations on deep traps in GaAs and $(Al_xGa_{1-x})As$ bulk layers grown by metalorganic vapour-phase epitaxy using the new alternative arsenic precursor diethyl-tert-butylarsin
Z. Spika, G. Zimmermann, W. Stolz, E.O. Göbel, P. Gimmnich, J. Lorberth, A. Greiling, A. Salzmann, S. Weiß, U. Sudjadi, A. Bock and R. Kassing 521
Reduction of interface contamination in regrown GaAs on AlGaAs using a novel two-step HCl gas etching process
H. Kizuki, N. Fujii, M. Miyashita, Y. Mihashi and S. Takamiya 527
Growth temperature dependence of Zn diffusion in InP/InGaAs heterojunction bipolar transistor structures grown by metalorganic chemical vapor deposition
T. Kobayashi, K. Kurishima and U. Gösele 533
Metalorganic vapor phase epitaxial grown heterointerfaces to GaInP with group-III and group-V exchange
W. Prost, F. Scheffer, Q. Liu, A. Lindner, H. Lakner, I. Gyuro and F.J. Tegude 538
Drastic effects of hydrogen flow rate on growth characteristics and electrical/optical properties of InP grown by organometallic vapour phase epitaxy with TMIn and TBP
Y. Fujiwara, S. Furuta, K. Makita, Y. Ito, Y. Nonogaki and Y. Takeda 544
Effects of storage time of epi-ready InP:Fe substrates on the quality of metalorganic vapour phase epitaxial grown InP
A. Knauer, E. Richter and M. Weyers 549
Growth and characterization of two-dimensional GaP on Si by metalorganic chemical vapor deposition
T. Soga, T. Jimbo and M. Umeno 554
Ordering in GaInP grown at low temperatures
L.C. Su, I.H. Ho and G.B. Stringfellow 558
Transport and reaction behaviour in Aix-2000 Planetary metalorganic vapour phase epitaxy reactor
T. Bergunde, D. Gutsche, L. Kadinski, Yu. Makarov and M. Weyers 564

SECTION X: MOCVD, MOVPE AND CVT II–VIs, OXIDES AND SULPHIDES

Metalorganic vapor phase epitaxy of wide-gap II–VI semiconductors for optoelectronic applications: current status and future trends *
M. Heuken 570
Thermal dissociation of ditertiarybutylselenide and methylallylselenide and its impact on the growth of ZnSe by metalorganic vapour phase epitaxy
W.S. Kuhn, R. Helbing, B. Qu'Hen and O. Gorochov 580
Synchrotron radiation excited growth of ZnTe using metalorganic sources
T. Ogata, S.I. Gheyas, M. Ikejiri, H. Ogawa and M. Nishio 587
Oxygen and tellurium impurities in zinc selenide grown by metalorganic vapour phase epitaxy
A.L. Gurskii, K. Vakarelska, W. Taudt, B. Wachtendorf, J. Söllner, A. Wahid and M. Heuken 592
Growth of CaS thin films by solid source metalorganic chemical vapor deposition
R. Helbing, H. Birecki, S.A. DiCarolis, R.S. Feigelson and R. Hiskes 599
Uniformity in (Hg, Mn)Te films grown by metalorganic vapour phase epitaxy
T.D. Hallam, Ş. Oktik, M. Funaki, C. Moore, A.W. Brinkman, K. Durose and B.K. Tanner 604

Growth of $Hg_{1-x}Cd_xTe$ epitaxial layers on (100) CdTe by chemical vapor transport under normal and reduced gravity conditions *
H. Wiedemeier, Y.R. Ge, M.A. Hutchins and Y.-G. Sha 610
Reduction of autodoped gallium concentration in HgCdTe layers on GaAs grown by metalorganic vapor phase epitaxy
H. Nishino, S. Murakami, H. Ebe and Y. Nishijima 619
Preparation of epitaxial $PbTiO_3$ thin films by metalorganic vapor phase epitaxy under reduced pressure
Y.-F. Chen, J.-X. Chen, L. Shun, T. Yu, P. Li, N.-B. Ming and L.-J. Shi 624
Growth of FeS_2 (pyrite) thin films on single crystalline substrates by low pressure metalorganic chemical vapour deposition
B. Thomas, C. Höpfner, K. Ellmer, S. Fiechter and H. Tributsch 630

SECTION XI: ORGANICS AND SUPERCONDUCTORS

Precise determination of the epitaxial orientation of a monomolecular layer organic film by scanning tunneling microscopy
A. Hoshino, S. Isoda, H. Kurata and T. Kobayashi 636
Atomic force microscopy observation of the epitaxial growth of organic molecules
K. Matsushige, T. Hamano and T. Horiuchi 641
Molecular orientation of vapor-deposited films of long-chain molecules observed with atomic force microscopy
H. Takiguchi, M. Izawa, K. Yase, S. Ueno, M. Yoshimura, T. Yao and K. Sato 645
Pseudomorphic vanadyl-phthalocyanine and its stable orientation on KBr
S. Hashimoto, T. Ogawa, N. Asaka, S. Isoda and T. Kobayashi 649
Effects of a lattice matching in hetero-epitaxially grown *a*-axis YBCO films on superconductivity
W. Ito, Y. Yoshida, S. Mahajan and T. Morishita 655
Liquid phase epitaxy of $Bi_2Sr_2CaCu_2O_x$ superconductor from a $BiO_{1.5}$–SrO–CaO–CuO solution
Y. Huang and M.-H. Huang 659

Author index 665
Subject index 674
